AGRO-METEOROLOGICAL ADVISORIES:

Crop	Pest/ Disease	Advisories
General Advisories: As a precaution, use bio-pesticides to control the crop pests and diseases.		
Rice (Mundakan) Seedling stage	Rice case worm	During rainy season, there is a chance of rice case worm in paddy field. To control this 25 kg sawdust or rice husk ash mixed with one litre kerosene can be spread after draining the field (for 1 acre).
	Gall midge	During rainy season, there is a chance of gall midge attack in mundakan paddy. As a prophylactic measure, root of the seedlings are dipped in 0.02% chlorpyrifos suspension for 12 hours prior to planting.
Ginger	Rhizome rot	During rainy season there is a chance of rhizome rot in ginger. To control, dig out the affected plants and drench the soil with copper oxychloride 2g per one litre of water.
Banana and Vegetables	Spodoptera	There is a chance of attack of spodoptera in banana and vegetables. Destroy the affected leaves along with the spodoptera.
Animal Husbandry		Vaccinate animals against foot and mouth disease and haemorrhagic septicaemia. (CAADECCS, KVASU Mannuthy)
