AGRO-METEOROLOGICAL ADVISORIES:

Сгор	Pest/ Disease	Advisories		
General Advisories: As a precaution, use bio-pesticides to control the crop pests and diseases.				
Rice(Virippu)		First paddy crop (Virippu) is in Harvesting stage. Land preparation for		
Harvesting stage	-	second paddy (mundakan) crop can be started.		
		Due to intermittent rainfall and sunshine, there is a chance of sigatoka disease		
Banana	Sigatoka disease	in banana. As a precaution, spray pseudomonas 20g per one litre of water. In		
		case of severe attack, spray 2 ml hexaconazole or 1 ml propiconazole per one		
		litre of water by mixing it with a sticker and spray on both the surface of the		
		leaf.		
		There is a chance of stem borer in vegetables. Spary 20 g Beauveria per one		
Ginger	Stem borer	litre of water to control stem borer.		
Vegetables	Fruit fly	There is a chance of fruit fly in vegetables. Remove and destroy affected and		
		decayed fruits. Use special pheromone traps like cuelure (6 nos/acre) for		
		vegetable fruit fly. Thulasi/fruit traps can be used. If the attack is not		
		reduced, spray mixture of malathion 2 ml per one litre of water + jaggery 10		
		g at flowering and fruit initiation.		
		Animal should not be allowed graze in open grazing lands to avoid lightening		
Animal Husbandry		risk. (CAADECCS, KVASU Mannuthy)
