Agro Meteorological Advisories:

Crop	Stage of the crop / Pest/Disease	Advisories
Paddy	Milky stage/Rice bug	Apply neem based pesticides (3 ml per one liter of water). Pesticides application should be done either before 9 am or after 3 pm. Otherwise, the pesticide application will adversely affect the pollination.
Coconut	Red palm weevil	There is a chance for red palm weevil in small coconut trees. As a control measure, mix 1 ml of imidachloprid in one litre of water and pour on its crown.
Banana	-	Continue irrigation. Straw Mulching is recommended to conserve moisture. Destroy the side suckers.
Vegetables (Amaranthus)	Leaf spot disease	Cut and remove the severely affected leaves. Apply 15 gm of Pseudomonas in cleared cow dung water after harvesting. Also apply Trichoderma mixed with cowdung in soil.
