Three day Skill Building Workshop on **Tools and Techniques for e-Content Development**

e-Learning

Advent of modern ICT tools has opened up new avenues in teaching and learning process. e-Learning has emerged as one of the cost effective and easily accessible methods for advancing knowledge and understanding. It is a learner-centric pedagogical method that meets the demand of learning anywhere, anytime, by any one. The instructional content for e-learning can be created by teachers using a number of open resources and delivered to learners using a variety of learning management systems.

The Skill Building Workshop

In this workshop, the participants will learn and participate to plan, design and develop instructional materials that facilitate e-learning. The workshop will focus on the use of MOODLE platform and new multimedia tools for creating sound, text, pictures and animations for use in e- learning. In addition, effective use of digital media based on pedagogical principles for technology enhanced learning, software tools for creating online and offline e-learning and its applications will be demonstrated with examples and hands-on practice. At the end of the workshop each participant will be competent to create a full fledged course in MOODLE.

Expected outputs

The output will be 10 to 12 minute e-content developed by each participant.

A module prepared for the National e-content reservoir offers academic credit equivalent to an international publication.

We earnestly solicit your presence and participation.
