NEW GENERATION SKILL ORIENTED CERTIFICATE COURSES

Top ranked University

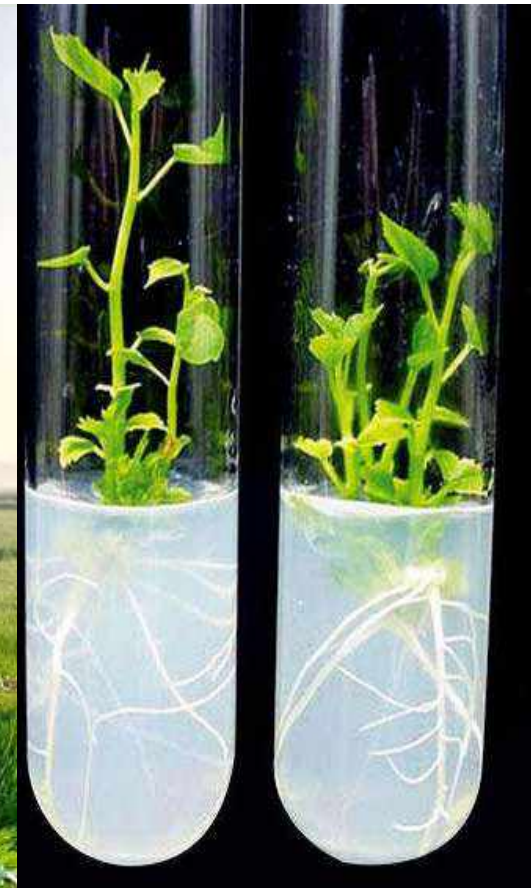

Enhancing skills in farming

Kerala Agricultural University, (KAU), right from its establishment in 1971, has been in the forefront of developing and fine-tuning the human resources needed to fulfill the great mission of ensuring food security. Agriculture, besides being an occupation is the strongest tool for human survival. KAU is well composed to meet the challenges for boosting the economy.

India needs its youth to be well trained, skilled and motivated. To address the emerging need for trained professionals in agriculture sector, Kerala Agricultural University introduces forty certificate courses through its various colleges and stations spread across Kerala.

These courses are designed to provide both theoretical as well as practical knowledge, hands-on experience and field visits for aspirants who wish to pursue a career in agriculture or enhance their existing skills in the respective field through online/offline and hybrid mode according to the syllabus and nature of subject covered in each course.

Introduction of certificate courses in agriculture sector is a step towards addressing the increasing need for skilled professionals in this field and will contribute to the overall growth and development of the agriculture sector.

Serving the farming community for the past 5 decades

OBJECTIVES:

1. Develop skills of learners in their area of interest in agriculture through new generation certificate courses.
2. Offer a competitive edge in the job market, providing learners the opportunity to improve their chances for job advancement or to acquire new job opportunities.
3. Provide personal development opportunities for learners to develop new interests, hobbies or talents.
4. Encourage lifelong learning by providing learners with new knowledge and skills in agriculture sector.
5. Update professionals and employees in their field which can be valuable for their organisation as well as personal development.
6. Provide learners with a credential that is recognized by employers in their field, making it easier to gain employment or admission to higher education programs.

Winner of Chancellor's award in 2020
